GROUP STUDY EXCHANGE

District 9830
[Tasmania – Australia]

WELCOMES

District 1510
[Loire Valley – France]

28th February 2010 – 1st April 2010
The Group Study Exchange is one of the many educational programs of The Rotary Foundation of Rotary International, offering a unique person-to-person opportunity for the promotion of better understanding and friendly relations among the peoples of the world.

The program provides for the exchange of teams of young business and professional people between paired Rotary districts in different countries, enabling them to study the history, geography, institutions, culture and the way of life of the host country as well as researching the team member’s own vocations in the country they are visiting.

While this program is designed to promote good will, understanding and peace, it also results in the exchange of ideas and the development of personal acquaintances and lasting friendships.
I would like to extend a very warm welcome to the visiting Group Study Exchange team from D-1510 Loire Valley, France.

I hope your visit will be an enjoyable and rewarding one enabling you to take back many fond memories of Tasmania and its people. Likewise by getting to know you I’m sure we will learn much about your culture and way of life.

For team members GSE is all about making new friends, broadening vocational knowledge and experiencing a different culture while living with local families. Rotarians are looking forward to your visit and will do everything possible to ensure your GSE experience meets your expectation.

Group Study Exchange is a popular Foundation program in our District. Most years we have two exchanges with the majority of clubs applying to become involved in the program.

My thanks to Chairman Peter Murfett and his team and to Rotary clubs for the time and effort they have put in preparing for your visit. You will have the opportunity to enjoy Tasmanian hospitality and hopefully sufficient time to appreciate the natural beauty of our island as you breathe the purest air in the world. Vocational days have been carefully planned and I am sure each of these days will give each of you an experience of long term value.

Welcome and enjoy the GSE experience.

Kevin Shadbolt
District Foundation Chairman
TASMANIA

Tasmania is the smallest and most picturesque state of Australia. Separated from the mainland by the 240 kilometre stretch of Bass Strait, Tasmania is a unique land of rugged mountains, evergreen forests, fertile farmland and scenic coastline.

Tasmania’s land area of 68,102 square kilometres is about two times the size of the Pays de la Loire region of France. The climate is temperate, with summer daytime temperatures often around 25 degrees Celsius while winter daytime temperatures seldom fall below 10 degrees Celsius. Rainfall is predominantly in winter.

Primary industries include agriculture, mining, fishing and forestry. Favourable climatic conditions result in varied agriculture that includes vegetable production, poppies for pharmaceutical products, pyrethrum for natural insecticides, dairying, beef, lamb and wool production. A clean and green image is being used to promote these products to the world.

Secondary industry plays an important part in the State's economy. It includes information technology, shipbuilding, mineral smelting, paper manufacturing, vegetable processing, cheese and chocolate production. Energy is currently derived from hydropower; wind power farms have been established and natural gas is also brought onshore.

Tourism is a significant industry in the state. Many tastes are catered for with heritage and wine trails and some of the world's best bush walking and fly fishing.

The island has a decentralised population of 503,000. The main centres are Hobart in the south (the capital city with 205,000 people); Launceston (98,500) in the north; and Devonport (25,000) and Burnie (18,000) in the State’s north-west.

Tasmania is one of six states and two territories that make up the Commonwealth of Australia. It was discovered in 1642 by the Dutch Navigator, Abel Tasman, and was initially known as Van Diemen’s Land. The British established the first permanent European settlement in 1803, and it became the final destination for their worst convicts. Convict transportation ended in 1853, and the island was renamed Tasmania in honour of its discoverer. Britain granted responsible government to the island in 1855 and in 1901 Tasmania became part of the Commonwealth of Australia.

European settlement devastated Tasmania’s aboriginal population, who had lived in Tasmania for about 35,000 years. Efforts are now being made to return key pieces of land to the descendants of the original Tasmanian inhabitants, and reconciliation is an important social and political issue in Australia.

Explore the possibilities
Welcome to GSE Team Members

A warm welcome is extended to the GSE Team from D-1510, Loire Valley in France to D-9830 Tasmania, Australia.

Our District has a strong commitment to the GSE Program and with the leadership of District Chair Peter Murfett the GSE committee has produced what we believe to be an excellent program. We hope that you will enjoy the wide variety of cultural opportunities during your visit and gain further insights into your choice of careers as you experience your vocational days.

You will also have the opportunity to enjoy Tasmania’s hospitality as you travel around our beautiful State. You will have time to appreciate the beauty of our natural wilderness areas as you breathe some of the freshest air in the world. There will also be many occasions on which you will sample our cuisine, see something of our primary and secondary industries, our political structure and government administration.

We look forward to welcoming you to our District Conference, which is always a highlight of our Rotary year, and to hear about your country.

We hope this GSE visit will be one of your most memorable life experiences and that you will come to appreciate our Australian way of life, enjoy the beauty of Tasmania and establish many lasting friendships.

Ian Shuey
District Governor
A very warm welcome to the visiting GSE Team from D-1510, Loire Valley in France. Tasmania is keen to provide you with an exceptional experience and a most enjoyable visit – we hope that you take back to your country a range of vocational learnings, a love of our State and new ideas.

Our Rotarians, partners and friends of Rotary always look forward to the visits of GSE teams with great enthusiasm and expectation. It is one of the icon programs of Rotary International which offers so much to participants. We share wonderful experiences with visiting GSE members and many of us continue close contact with the Team Leader and Members, giving us a better understanding of each other and bringing our worlds closer together. The latter is one of the highlights of GSE.

As you will be aware, a GSE visit requires a lot of preparation by the Team Leader and Members. Likewise, we as the host District have tried to ensure that the planning and preparation by our District Committee, Rotarians and host families in visited clubs, and the many people who will contribute to your visit, has been professional and well organised.

I want to offer my grateful thanks to all in Tasmania who have contributed in the planning of this visit – without the giving of your time and your cooperation GSE could not happen.

The Program covered in this booklet is detailed and challenging – I am sure you would not have expected otherwise. We hope it meets your expectations and includes many of the wishes you have for your visit.

I look forward to spending time with you while you are here. I trust that you gain from the visit as much as I did as a Team Leader to India some two years ago and that you return to France as ambassadors for Tasmania in Australia.

Peter Murfett

Note:  If phoning from outside Australia: dial +61 for the Country Code, then “3” for the Area Code, followed by the phone number. Omit the initial ‘0’ for mobile numbers.
I was born in Vendée 64 years ago. Electronic engineer, I worked at first for a subcontractor of the French army as person in charge of quality, then I came back in Vendée to create a computer manufacture. After that I created a computer shop to distribute both hardware and software.

I am married with Nicole. My wife is retired from the Post office and I have a son Christophe who works in Paris as a computer specialist.

I am still working to improve my English.

My hobbies are: reading, jazz music and hiking in the countryside or around the world.

My personal slogan is: “A stranger is a friend whom I have not met yet.”
I was born in Vendee 30 years ago. I am single. I am a technical salesman in the landscape industry.

I started my professional career selling swimming pools. Thereafter, I specialized in the aquatic area of landscape work, designing, building and maintaining of pools including natural swimming pools, making me an “aqua” technician. Today, I am in charge of the aquatic branch of the GARON Paysage Company.

I am naturally attracted to sciences, and working hard to improve my English.

I often go fishing, particularly fly-fishing. When I travel, I’m very interested in knowing about the “local” biotopes, and I prefer spending a day in the countryside instead of cultural tourism as such.

My hobbies are: playing pool, climbing, surfing, underwater hunting, sailing, reading, dancing (salsa and rockabilly), and cooking.

My personal motto: “There is no problem, there are only solutions.”
I was born in Les Sables d’Olonne and grew up most of the time in La Rochelle. After my exams I went to Florence, Italy to study restoration of paintings.

I love arts in general, reading, travelling, cooking and gardening.

I restore paintings, wood sculptures, gold frames; I make painting copies and create my own works. The main goal in restoration is to give back to artworks their first objective (religious, historic for example) and allow them to pass through time.

I organize conservation of paintings/sculptures during inside and outside art exhibitions. Sometimes I make ornamental frescoes in private houses.

In a typical working day I am working on my account. I have to organize my works (paintings, website, and exhibitions organization) according to my clients’ orders (restoration, copies or creation). I am also looking for jobs in restoration aboard for short periods of time.

In Australia I would like to see (and possibly work) in an aboriginal community. All cultural sites with art and history, like museums, restoration laboratories, and handcraft (sculptures, paintings, works with gold, ceramic…).

Specific places I would like to visit include Salamanca Market, Tasman Peninsula, Battery Point, Mont Wellington, Freycinet National Park, Cataract Gorge, Tamar Island, Tasmanian Aboriginal Culture Centre, Stanley.

My vocational goals from this GSE experience are to discover others arts and cultures, especially aboriginal ones, so different from my European point of view. I wish I could work with aboriginal handcraft makers. Working every day with natural products (saffron, lapis lazuli, malachite) for painting restoration and my own creations, I am very curious and interested in the different uses of products coming from Nature in art.
I come from a little village named Thiré.

I have a student sister, Eve. I live in La Rochelle with Franck, my companion.

As a qualified nurse I have been in the care environment since 2005 with psychiatry, elderly people and home care being my favourite domains.

My hobbies are social dance, tennis, reading and cinema. I like to go for walks by the riverside or seashore, cycling and spending time with friends at evening parties.
I am from Nantes and I have settled in Pouliguen which is close to La Baule.

I am a commercial graduate and like researching customers and their requirements. Customer service is very important to me.

I like boat and wind surfing and often go with my friends to Events (a small island not far from La Baule). I also like evenings in a piano bar especially when famous pianists are playing.
